

In this map of Fyshwick, the blue circle at 16 Ipswich St locates the Capital Recycling Solutions Materials Recovery Facility and Waste Transfer Terminal. CRS also has an approved Truck Freight Terminal. The associated Access Recycling scrap metal facility is adjacent and all waste facilities are located between Ipswich and Lithgow Streets. EIS201700053 was allowed by Planning Minister Gentleman and the DA for the MRF is imminent.

The second blue circle at Tennant St is where Hi Qual propose to operate its major Integrated Resource Recovery, the first waste facility of its kind in the ACT and of the largest in Australia. It will handle waste streams that currently go to landfill. The operation includes processing using innovative techniques. Hi Qual will handle more than the whole of Canberra's waste production in excess of a million tpa and will include transporting waste that has been delivered to its Windellama Landfill 90km away. Concrete crushing not authorised for an urban site is included. Asbestos will be stored onsite.
